

BULL'S EYE TOSS GAME

This is a playground game that can be used to assist children in using their basic motor skills and throwing accuracy. The common way of playing this game is to throw a stone or bean bag from the numbers 1-5 to the target or "bull's eye" in the centre. The higher the number hit the more points "scored". Players can take turns throwing.

Throwing from the number 5 space is the most difficult and throwing from the number 1 space being the easiest. Children can adjust from space to space and keep score by the point value their position is in the rings.
